## **THE SPIRAL SHEAR Model 61**

***Reduces and converts  
brush into kindling and  
BBQ Chunkettes.***

**(707) 459-6219**

## The Spiralshear:

The Spiralshear shears through wood with a quiet slicing action producing chunkettes. Our present model shears bushy pieces up to about 1 1/4" diameter. The slowly rotating (30 RPM) Spiralshear draws the branches in automatically, but the operator can halt the feed by simply pulling back on the branch.

Most of the chunketts vary in size from 2" to 4" long with diameters from twig size to 1 1/4 inches. These chunkettes can be spread on a flat surface where the sun will dry the BBQ chunkettes. The BBQ chunkettes are easier to light. Most folks prefer the natural flavor, free of chemical fumes from fire starters.

Safety Guard removed for illustration.

## Specifications:

The **Spiralshear Model 61** is powered by a 1 1/2 HP (10 amp, 120 volt, 1200 watt) AC gear motor. The Spiralshear will operate on ordinary home electricity. It is more convenient to power the Spiralshear out in the woods from an electric vehicle equipped with a 2500 watt DC to AC inverter.

## The Spiral Cutter:

The **Spiral cutter** is a unique development from EBC. The unit is extremely quiet, and our competition's device is ear-splitting. Rather than trying to burn chips, it makes a very burnable fuel. Satisfaction guaranteed!

**RETAIL PRICE: \$ 1,995.**
